

Wildlife

1. The wildlife event will consist of three parts: Identification of bird and mammal species (50%), aging and sexing of selected birds and animal species (25%) and identification of food plants (25%). Scientific names for wildlife food plants must be correctly spelled, capitalized, and underlined.
2. Each competing member club shall enter two (2) contestants.
3. Each team will have two (2) minutes to jointly identify each specimen or give other requested information such as sex or age.
4. All specimens used in the contest will come from the enclosed lists. Mammal specimens may consist of skulls, study skins, or entire specimens. Plant specimens may consist of fresh material, herbarium sheets, Riker mounts, or high quality photographs.
5. Common names only will be required for mammal and bird specimens, while common and scientific names will be required for plant specimens. Common names found in the book used as the standard for the event shall be used.
6. Contestants may be required to sex white-tailed deer by pelvic girdle and assign age at exact 6- month age classes (1, 1.5, 2, 2.5 years) up to and including age 2.5 and at whole year intervals (3.5, 4.5, etc. years) thereafter by jaw examination. Amended March 21, 1996. Contestants may be required to sex bird species in the list designated by descriptive wording, also from wing examination. In the case of the mourning dove, only age will be required.
7. Contestants may also be required to give the wildlife species primarily utilizing the food plants as designated in appended list.
8. In case of a tie, the contest will continue between tying teams until one is eliminated.
9. All mammals, with the exception of the domesticated cat, are described in The Mammals of North America, 1981, 2nd edition, by E. Raymond Hall. The A.O.U. Checklist of North American Birds, 6th edition, American Ornithologists Union of the 1982 Supplement to the A.U.K. Techniques is the official sources for the names of birds. Techniques for aging and sexing may be found in: Wildlife Management Techniques, 1980, 4th edition, edited by S.D. Schemnitz. The official source for the plant names shall be: Manual of the Vascular Flora of the Carolinas, 1983, 9th edition, by A.E. Radford, H.E. Ahles, and C.R. Bell.
10. Each contestant will be allowed to use a 10X hand lens in the wildlife exam and nothing else.
11. The stations must be at least five (5') feet apart.
12. If a species name shows up on the dendrology, wildlife, or wood identification lists, they will all have the same common name.
13. The Species List for the Wildlife Event is located in the Appendix.

Suggestions for Judge's Committee

Wildlife

1. Prior to the contest gather all contestants at least 30 minutes before the event is scheduled to start; record the contestants' names at this time (Please print clearly).
2. Read the rules to the contestants. Settle any questions or problems now if at all possible.
3. Ask all contestants if they have any objections to the wildlife list.
4. Run the contest in the fashion that best suits you. Try to complete it as quickly as possible.
5. Grading of test sheets will not be done while contestants are present.
Therefore, to avoid having to locate tied contestants, provide the contestants with 3 to 5 additional test questions/specimens. Check for ties in first, second, and third places. Only these three places must be resolved by runoff. Use the first question/specimen to separate the tie. If a tie still exists after the first tie-breaker question/specimen, use the second one; hopefully 3 to 5 tie-breaker questions/specimens will suffice.
6. Be careful in checking the spelling of each name given on the answer sheets. Spelling errors on scientific names count 1/2 off of the credit for that portion of the answer.
7. Be sure to have the head judge sign the score sheet and indicate the time that the event ended.
8. Be sure to turn in the completed score sheet to the head scorekeeper.
